

## UdderlySAFE is a program developed specifically for Dairy operations.

UdderlySAFE is a proprietary, online software which houses and maintains Human Resources (HR) and Health and Safety (H&S) programs, policies and procedures, training, team member personnel files and so much more!

Every day, dairy producers are logging- in to UdderlySAFE to access online training, review training records and view documents that are always available.

UdderlySAFE would like to become part of the day to day operations for your dairy operation!

The UdderlySAFE team is dedicated to your business' success and is available to assist with any HR or H&S questions or concerns by telephone or in person- whenever the need arises.

“With the UdderlySAFE team’s practical knowledge, willingness to learn, customized programs and realistic timelines, it has made it easy to keep health and safety a top priority on our farm. Farm safety is a concern for employers, employees and our families. The UdderlySAFE team is a pleasure to work with to keep safety a key priority”

**Evert Veldhuizen**  
Veldale Farms Ltd.

“UdderlySAFE helps us to improve our communication, how to give our meetings structure, how to listen to each other and avoid unnecessary stress. The UdderlySAFE team is part of our Village of Advisors”

## The UdderlySAFE Path to Safety

### 1 Farm Safety Assessment

We conduct a full onsite health and safety (H&S) assessment, with the input of the Farm Manager/Owner, to discover gaps in your compliance with the Occupational Health and Safety Act. This includes past accidents, areas of concern, equipment, inspections and more!

### 2 Research & Customization

Utilizing the assessment information, we then conduct additional research to create a customized H&S program to meet your dairy's unique needs. This entire program is loaded into the proprietary online software, UdderlySAFE, for your team's ease.

### 3 The Launch

With your entire team, we launch your dairy's customized H&S program. This includes an overview of the online software, team members' profiles and passwords, as well as the building of your H&S Communications Board and an overall introduction to your dairy's new H&S program.

### 4 UdderlySAFE Monthly Meeting

The safety talk is easily conducted by your H&S Representative using the content the UdderlySAFE team sends you. Signed attendance sheets are sent back to your UdderlySAFE team and uploaded into each team members' files, as proof they have received additional H&S training.

The topics chosen for the monthly package focus on industry and seasonal hazards, as well as current Ministry of Labour Blitz items, and other H&S risks that effect dairy farms. Monthly safety talks and workplace inspections demonstrate due diligence, fulfilling legislated HR and H&S obligations.

### 5 Annual Check Ups

At least once a year, your UdderlySAFE team will visit your location to conduct an audit on your H&S program. At this time we will implement any additional requirements identified. We ensure that with the growth and changes of your dairy and the dairy industry, your H&S program remains relevant and compliant.

### 6 Constant Contact

When your team is working, ours is too! Your UdderlySAFE team is available for constant support.
